PRIME MODELS 2023

Sophisticated front doors

The decisive factor for your well-considered purchase decision is certainly the appearance. The spark must jump over. Whether modern, classic, purist or charming - the front door must suit you and the style of your house. Wood front doors from KNEER-SÜDFENSTER are not only beautiful to look at and inviting, but also convince through inner values such as a robust construction, high security and good thermal insulation.

An innovative, technically mature front door fulfills its tasks for many years and looks very good at the same time!

Standard Equipment
handle BA 3058
plano-rosette angular BA 3520

*The door leaves are unique,
extreme colour deviations can
occur due to the raw material*

NATURAL, RUSTIC, ORIGINAL

Feel the breath of past centuries: if this entrance door could tell stories!
It would certainly be interesting to learn where this oak was once planted,
how it survived the wars and what was built and carpentered from its wood.

Standard Equipment

*automatic-lock with daytime function | fully concealed hinges | frame wood type oak, colour RAL 9005 jet black
door leaf outside oak old wood | door leaf inside oak knotty cross veneered brushed | handle and rosettes freely selectable*

please consider, we recommend to install the door only in a protected area for example recessed or roofed or porched in order to avoid a direct weathering through rain or sunlight!

NATURAL WOOD SURFACES

The door leaf can be designed in the types of wood oak and larch. The cross veneer is executed brushed. The color differences and rough branches are deliberately emphasized. The veneer of the surface is much more knotty and lively like that of the oak. The expression of the individual veneers can nevertheless vary. The frame is executed in a covering shade, so that on the one hand the traditional and on the other hand modern look of the door comes into its own. Since the top coat on the door leaf has only a very low pigmentation, a constructive weather protection of the door is necessary.

The following doors are available with brushed cross veneers:

HT A 23-327 | HT A 23-328 | HT A 23-329 | HT A 23-331

SMART-HOME

SAFETY BEGINS OUTSIDE THE DOOR

SmartConnect door is a modern, smart video door intercom system that opens up new possibilities for you. Via tablet or smartphone you can always and everywhere get in touch with your visitors, even if you are not at home. The small and discreet door module also contains a smart home server that can be used to manage users and access authorizations in addition to opening the door.

NOTE

SmartConnect door is only possible with **PREMIUM** and **PREMIUM+** entrance doors.

ATTENTION SmartConnect door is not possible with HT A 23-338!

COMFORTABLE OPERABILITY

- ✓ Intuitive operation of the door intercom system via smartphone app
- ✓ Location-independent interaction with visitors - authorized mobile devices receive a push message as soon as the bell is rung
- ✓ Individual user administration with time profiles

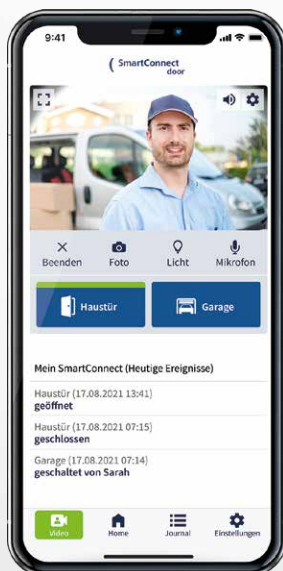

HIGH SECURITY

- ✓ High system security through secure encryption and user accounts
- ✓ You can see your visitors, speak with them, open the door - a log of everything that happens in front of your entrance door
- ✓ Additional security: A presence is suggested to the person ringing the bell and you can see who is at your entrance door at all times

CAMERA

LANGUAGE MODUL

TOUCH-BELL

NOTE

For SmartConnect door, the door must be near a WLAN network

SPECIAL EQUIPMENT

ACCESS OPTIONS

All doors are equipped as standard with an automatic lock (without E-opener).

By pulling the door, the latch bolts at the top and bottom of the door automatically move 20 mm into the bolting bar. As a result, the door is always locked - without locking with the key. A day trap (also called snapper or latch) is also integrated in the lock, however, the automatic locking must be deactivated for use.

1 E-OPENER

Electric door opener - for using, the automatic lock has to be deactivated manually. The E-opener is integrated in the face plate.

- ✓ Easy opening of the door by actuation of e.g. the domestic intercom system
- ✓ No need to walk to the door

2 AUTOMATIC LOCK WITH M-OPENER

Door opener with motor-driven release - By pulling the door closed the multipoint lock will be activated without locking it. Releasing is done by pressing the handle or for instance by a domestic intercom system. Electrical opening options such as fingerprint or domestic intercom system are overridden by manual relocking.

- ✓ Maximum security without locking
- ✓ The automatic and the motorised locking complement each other
- ✓ Ideal for access system in single and multi-family houses

3 FULL MOTORIZED LOCK

Opening and closing is motorized - as if by magic. As soon as the door falls into the lock, the lock independently closed, without any manual closing. The opening of the door is comfortably motorized via door opener the intercom system or via access systems.

- ✓ Maximum comfort and security
- ✓ Increased tightness
- ✓ Panic function as standard, opening the door from inside is always guaranteed

FULLY CONCEALED HINGES

All **PREMIUM+** front doors are equipped with concealed hinges as standard.

You have the possibility to upgrade all **PREMIUM** and **BASIC** front doors with concealed hinges.

FINGERPRINT ACCESS SYSTEM INCLUDING M-OPENER

The fingerprint includes the M-opener listed above. The automatic locking and motorized unlocking is thus ensured and thus increases the safety. Electrical opening options such as fingerprint or domestic intercom system are overridden by manual relocking.

ALSO
AVAILABLE IN
JET BLACK

- ✓ comfortable operation, you don't have to carry a key
- ✓ external access is not only possible via the key but also via the fingerprint - you have the choice
- ✓ the door is always closed and thus provides maximum security
- ✓ our fingers are unique and cannot be replicated or get lost, the fingerprint ages with you
- ✓ pull the taught fi nger over the scanner, the green light will illuminate and the door will unlock

DETAIL

1 INTEGRATED IN THE DOOR LEAF

fingerprint in jet black

DETAIL

2 INTEGRATED IN THE HANDLE BAR

Installation height of the fingerprint approx. between 1350 mm and 1600 mm depending on the door height and model. Push bar angular 40 x 20 mm with:

push bar length 1300 mm	-	BA 3036
push bar length 1500 mm	-	BA 3037

OPTIONALLY SINGLE SPACE MONITORING

With this variant you have the option to delete or shut down individual fingers. Controllable only via App (if you have a smartphone with Bluetooth-function).

SAFETY TECHNOLOGY

SECURITY AND SAFETY FOR YOUR HOME

Your new entrance door should be inviting for visitors and deterrent for burglars.

First and foremost, it must guarantee safety because burglars choose this way more and more often.

Even with the basic equipment we therefore attach great importance to the solid safety mechanism.

SAFETY COMPONENTS

STANDARD EQUIPMENT

- 1 Lock tested corresponding to security class RC 2: when closing the door the latch bolts drive 20 mm into the bolting bar via a magnetic impuls at the top and bottom of the door. Therefore the door is always closed - without re-closing with a key.
- 2 The main bolt can be locked with a key turn - the lever blocks for control purposes, as a child safety lock and for maximum security.
- 3 Continuous bolting bar: protection against prying on the lock side
- 4 Cylinder with drill protection
- 5 5 Interior handle in stainless steel with exterior cylinder cover (ES1-part): serves as a pull protection for the cylinder
- 6 Stable roller conveyor: triple security on the hinge side

ON REQUEST THE PLUS IN SAFETY

- 7 P4A safety glazing: One pane consists of a composite of two panes with integrated security foil. Furthermore, the glazing is glued circumferential with a special adhesive in the glass cut-out. Thus, the glass connection is secured. | Safety execution RC 2 **against surcharge**

The status **RC 2 TESTED** achieve the following front doors

- ✓ Without glass cut-out through standard equipment: HT A 23-305 | HT A 23-327 | HT A 23-328 | HT A 23-335
- ✓ Through the use of an additional P4A protective glazing:
HT A 23-307 | HT A 23-311 | HT A 23-318 | HT A 23-321 | HT A 23-325 | HT A 23-329 | HT A 23-331
- ✓ For front doors of series 3 you can get an RC 2 test certificate as an option | **against surcharge**
